TECHNICAL SKILLS

AI/ML & GenAI: OpenAI API, Claude, Prompt Engineering, Agentic Workflows, MCP Servers, LLMs, Generative AI, NLP, TensorFlow, PyTorch, DeepLabCut, Anipose, Transfer Learning, Machine Learning
Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3
Frameworks: React, Angular, Node.js, Express.js, FastAPI, MERN Stack, MEAN Stack, React Native
Cloud & Databases: AWS (EC2, S3, RDS, Lambda), Firebase, PostgreSQL, MongoDB, MySQL, SQLite
CI/CD & DevOps: Azure DevOps (Pipelines, Repos, Test Plans), Jenkins, Docker, Git, GitHub Actions, SonarQube (familiar)
Testing & QA: Playwright, Cypress, Selenium, Postman, TestNG, JUnit, Jest, Mocha, BrowserStack — E2E, Regression, BVT, UAT, API Testing, TDD, BDD
Agile & Tools: Agile/Scrum, SAFe (familiar), Kanban, Jira, Azure DevOps, Sprint Planning, Cursor, GitHub Copilot, n8n, Ollama

WORK EXPERIENCE

Allegion | Software Quality Analyst | Indianapolis, IN

Oct 2024 – Present

- Built **Command Central** — an internal GenAI-powered automation tool that uses **NLP-based transcript parsing** to process Teams meeting transcripts, auto-generate Azure DevOps work items via **prompt engineering**, schedule follow-up meetings, and track sprint releases on a live dashboard with role-based views for QAs, BAs, and developers.
- Led migration from Testim.io to **Playwright** across **3 applications and 15 environments** (Dev, QA, UAT, Production), reducing regression execution from 90 min to 15 min (**80% faster**) with scheduled nightly runs and a **95% pass rate**.
- Developed and maintained **80+ automated test scripts** in Playwright integrated into **3 Azure DevOps CI/CD pipelines**, catching **5–10 defects per sprint** before production across bi-weekly release cycles.
- Managed **150+ test cases** (manual + automated) across 3 enterprise applications, owning end-to-end QA — test plans, regression/smoke/BVT/UAT execution, sprint planning, story grooming, and **5–10 PR reviews per sprint**.
- First beta tester for the team's QA AI Kit (powered by **Claude**) — added **25 skills** using **prompt engineering**, validated across **3 test cycles**, and drove adoption across the QA team.
- Triaged **5–10 issues per sprint** and managed cross-functional stakeholder communication with support groups, managers, and Product Owner with zero delivery disruption.

PROJECTS

3D ASL to Text Converter | Python, TensorFlow, DeepLabCut, Anipose, NumPy, Matplotlib

- Engineered a real-time 3D sign language to text converter leveraging **DeepLabCut and Anipose** for precise hand gesture tracking, applying **transfer learning** and data augmentation to optimize pose estimation accuracy.
- Deployed **TensorFlow** for efficient model inference and integrated **Matplotlib** for real-time 3D pose visualization to validate the conversion pipeline.

Behaviour Based Hospice Accountability System | React, Node.js, PostgreSQL, Jest

- Architected a full-stack accountability platform for hospice facilities using **React, Node.js, and PostgreSQL**, with HD animations and intuitive UI to enhance patient engagement and medication compliance.
- Led development in an **Agile team of 5** — sprint planning, daily stand-ups, **Kanban/Jira** task tracking, and iterative delivery for client F&S Digital.

Helix | Open Source | github.com/vamshivitali76/helix-job-automation | Python, Ollama, OpenAI API, Discord API

- Built a Discord bot that automates the job search pipeline — scrapes listings, uses **GenAI to tailor applications** per job description via **prompt engineering**, tracks status, and sends real-time alerts.

Tokie | Open Source | github.com/vamshivitali76/Tokie | Python, FastAPI, SQLite, HTMX, MCP

- Built a CLI + dashboard that normalizes token usage across **Claude, Cursor, Codex, and OpenAI APIs** into one view with quota alerts and tool-switching recommendations via **MCP server integration**.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ

Jan 2023 – May 2024

Master of Science (M.S.), Computer Software Engineering

Jawaharlal Nehru Technological University, Hyderabad, India

Aug 2018 – Sep 2022

Bachelor of Technology (B.Tech), Computer Science and Engineering
